- Demister pad
- RGBW Colour LED's with remote or wall control.
- Standard light strip 45mm wide or custom width.

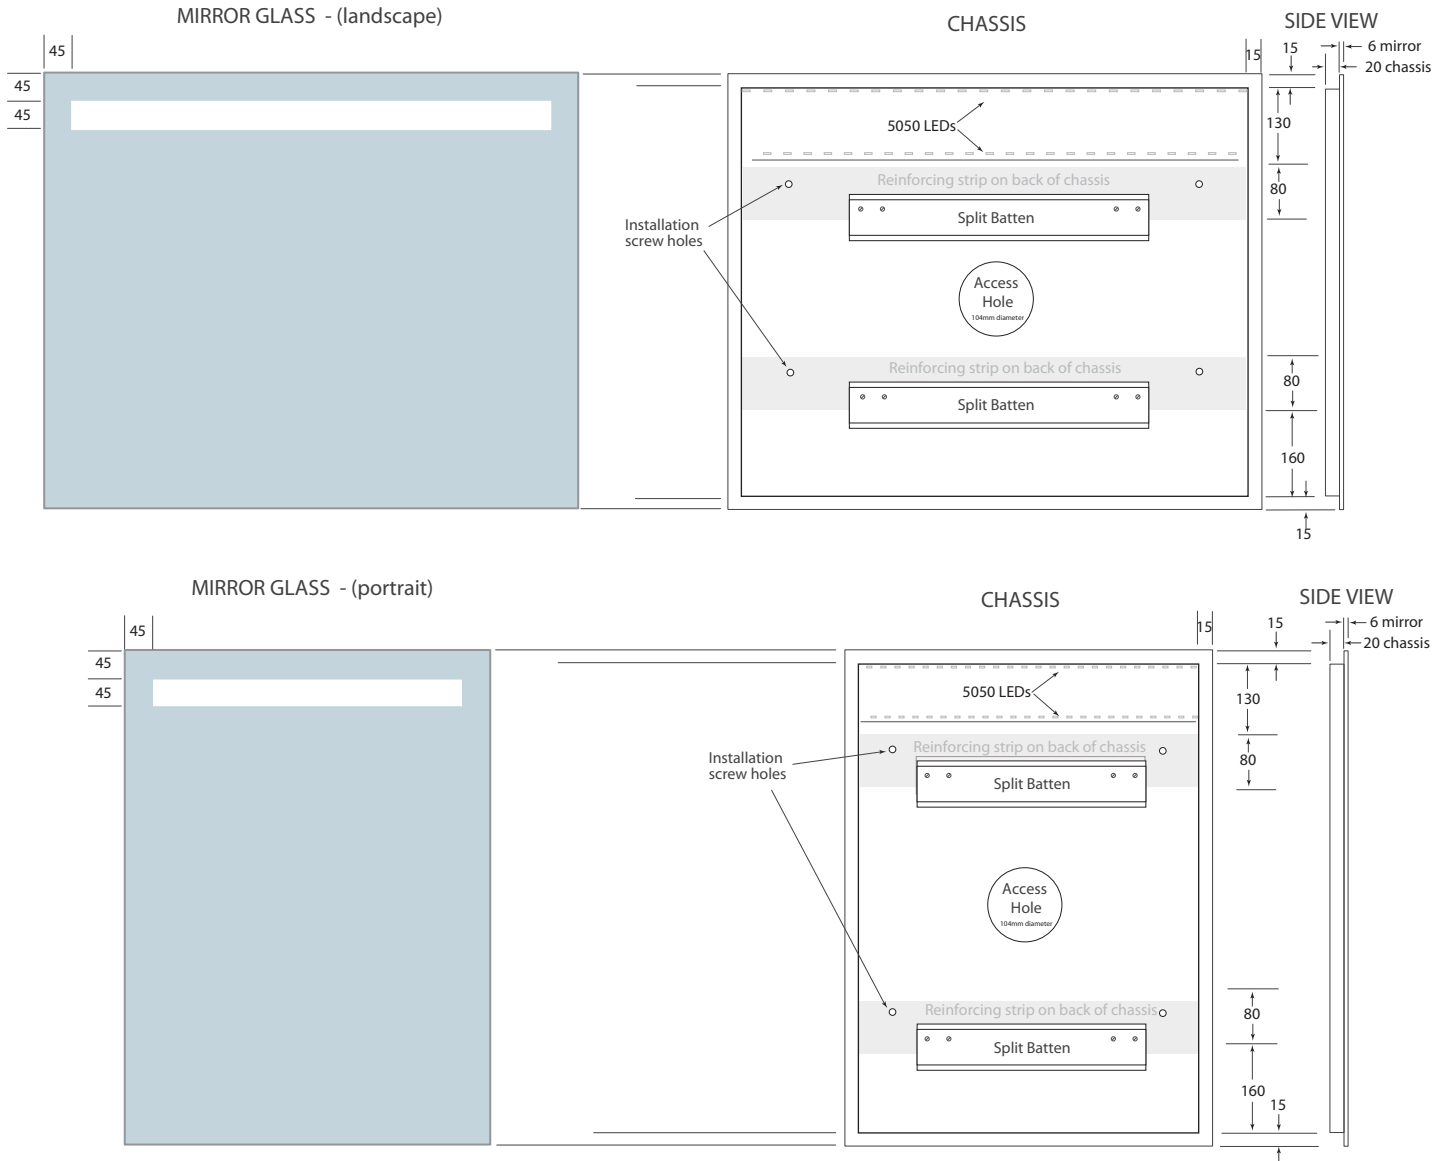

Key factors in the Bathroom Lighted Mirror range include

- Designed and Made in Sydney, Australia.
- Standard low profile of 20mm between the back of the mirror glass and the wall. With that low profile of 20mm this makes a Clearlight Designs Lighted Mirror the thinnest Lighted Mirror in the world.
- All aluminium backing structure. Each mirror is hung with two of our double split battens in our safe and easy, exceptionally strong, hanging system.
- The mirror. The most important component. We use Guardian Ultra Mirror (copper free). Guardian has recently introduced numerous improvements in both the production and the protective layers that coat the silver, resulting in sharp, beautiful reflectance and uncompromising durability. They use a silvering process that replaces copper with palladium resulting in a more durable mirror. The mirror's backing has an ultraviolet coating for added durability.
- Our standard **Focus** light style mirror has a row of LEDs on both sides of the strip light.
- Safety. Powered by 12volt DC and IP67 rating of components ensure that our mirrors are safe from possible electric shock, especially in the potentially wet area of the bathroom. The de-mister heating pads, also 12volt are made in the UK and are of the highest quality.
- Lighting. 12vDC 5050 LEDs that output 15 lumens per chip or 900 lumens per metre, CRI ≥90.
Natural daylight (4000k) 14.4 w/m. (standard)
Warm white (3000k) 14.4 w/m. (optional)
RGBW 23 w/m. (optional)
