

## Reverb Bathroom Mirror

### FEATURES

- Super Slim 25mm! off the wall
- Proudly designed & made in Australia
- 70,000 hours energy efficient LED lighting
- Turn on/off with a light switch on the wall
- IP67 rating
- Powered by an energy efficient 12V DC power supply
- Australian copper free mirror (no nasty black creep!)
- Easy installation
- 3 year warranty

### SHAPE OPTIONS

- Rectangle
- Square
- Circular
- Custom

### EXTRAS

- Dimmer with remote control
- Demister pad
- RGBW Colour LED's with remote or wall control

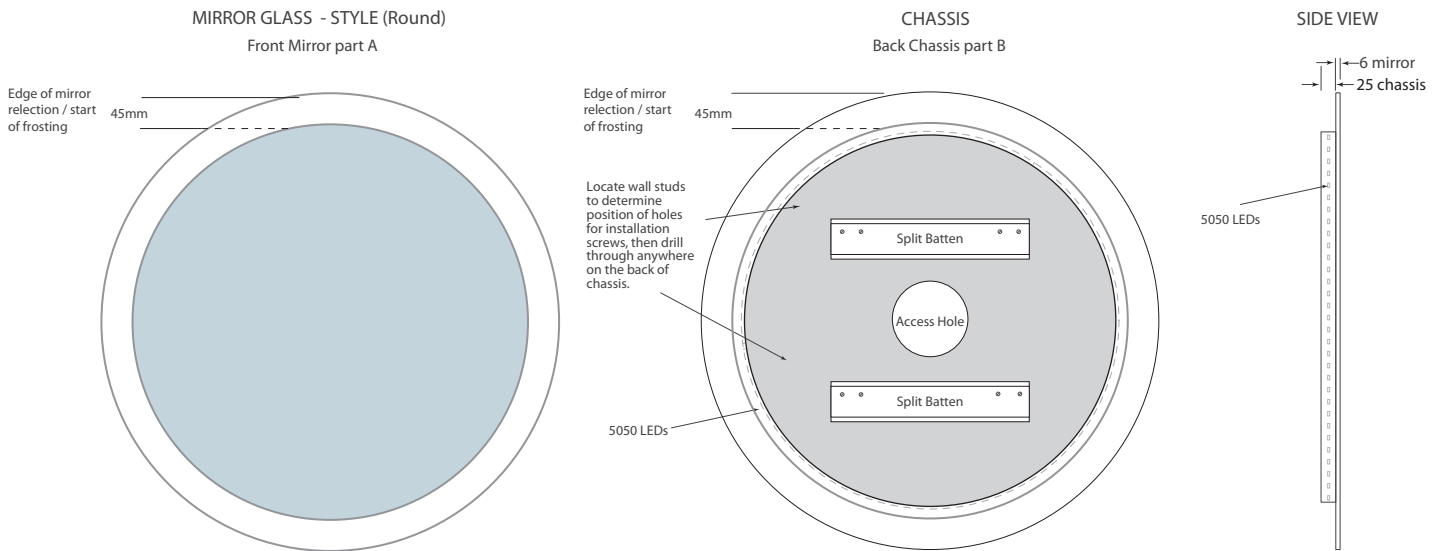

### Key factors in the Bathroom Illuminated Mirror range include

- Low profile of 20mm between the back of the mirror glass and the wall.
- All aluminium backing structure.
- The mirror itself is the most important component. We use Viridian Décor® mirror, arguably the best mirror in the world. Made in Dandenong Victoria from Australian made glass that is coated with silver and double protective coated to ensure longevity. And importantly copper free. Copper is used in low quality mirrors and causes tarnishing within a few short years. We stand behind Viridian's claim of high quality. It even takes a lot longer to sandblast through the double layer of protective paint that seals Viridian mirror. Sandblasting is after all a speeded up weathering process as abrasive sand is blasted at the back of the mirror to remove the paint. We have tried and tested many imported mirrors over recent years. The ease of sandblasting the imported mirrors is a testament to the lower quality.
- We place our lights around the outer edge of the sandblasted strip so that the light is directed back to the centre of the mirror. i.e. towards your reflection. As far as we can determine all other mirrors on the market run the LEDs around the inside of the light strip. This effectively directs the light away from the mirror and across the wall. The distance around the outside of the light strip is longer than around the inside. This means we use more LEDs giving you more light for the same size mirror.
- Safety. Powered by 12volt DC and IP67 rating of components ensure that our mirrors are safe from possible electric shock, especially in the potentially wet area of the bathroom. The de-mister heating pad is made in the UK and is of the highest quality and safest we have been able to source anywhere in the world.

Clearlight Designs is committed to giving you an outstanding service, and prides itself on supplying you with excellent handcrafted products designed and made in Australia.

## REVERB BATHROOM ILLUMINATED MIRROR - Specification Sheet

All measurements in millimetres

The 'Front Mirror Part A' sides over and locks onto the split battans on 'Back Chassis Part B'

MODEL NUMBER	DIMENSIONS (IN MILLIMETERS)	MIRROR THICKNESS	POWER	LIGHTING
